

Material: Spanish steer, wet blue

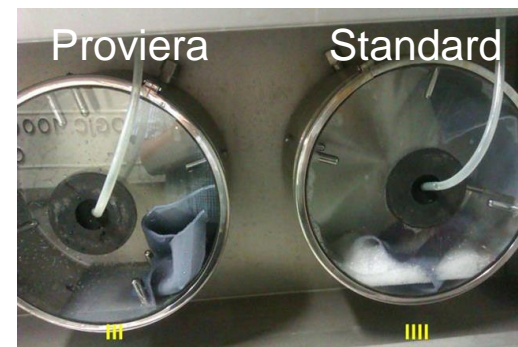

Process: Washing: 0.5% **PROSPREAD** (*eliminated oxalic acid and surfactant*)

Dyeing: 0.5% **PROSPREAD** (*eliminated ammonia, dye dispersant and dye auxiliary*)

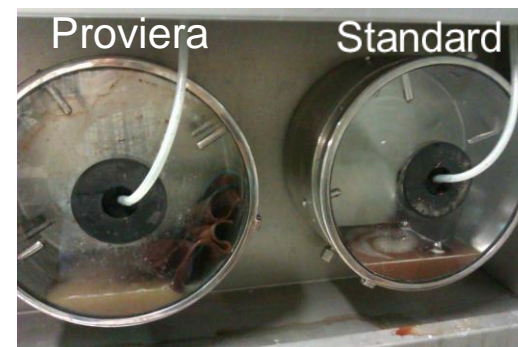

Results: No foam with Proviaera.

- Better dye exhaustion.
- Excellent evenness despite low pH to start dyeing.
- Good dye penetration.

Conclusion: Excellent performance on wet-end operations. Elimination of ammonia (oxidation agent which could lead to looseness).
